Technologies: Php, Laravel, JavaScript, Bootstrap, AJAX, JQuery, MySQL, Stripe APIs, Content Management Systems (CMS), Payment Gateway, Google Map APIs, Jira, Rest APIs, Git,

EDUCATION

NED University of Engineering & Technology, Karachi

Bachelor of Engineering (Computer System) | 01/2021

PROJECTS

ORKO:

ORKO is an AI-driven platform for managing both electric and internal combustion engine (EV/ICE) vehicle fleets. It provides comprehensive tools for diagnostics, remote fleet management, and trip analytics, helping fleet operators optimize their operations and extend the life of their assets. The platform supports a diverse range of vehicles, including 2-wheelers, 3-wheelers, and 4-wheelers, and offers features like route optimization, driver coaching, and efficient energy management. ORKO empowers businesses to streamline their fleet management processes through data-driven insights while also promoting sustainability by supporting the electric vehicle industry.

Baltimore Directions:

Baltimore Directions is a real estate platform that showcases available properties across the USA. Users can browse listings by area, view detailed property information such as the number of bedrooms, bathrooms, kitchens, and price, along with the exact location on Google Maps. The platform allows potential buyers or renters to express interest through a contact form, while property owners can upload their property details and images for sale or rent. The platform streamlines property transactions, making it user-friendly for both buyers and sellers.
